DELTA DENTAL 2012 FALL DENTAL SEMINARS

Sponsored in partnership with the University of Michigan School of Dentistry

Prosthodontics Today—Combining New Technologies and Old Technologies
Michael E. Razzoog, D.D.S., M.S., M.P.H.
September 21, 2012
Treetops Resort
Gaylord, Michigan

Non-invasive Management of Dental Caries: Opportunities and Challenges with the Products Available Today
Carlos González-Cabezas, D.D.S., M.S.D., Ph.D.
October 19, 2012
Sheraton Detroit/Novi Hotel
Novi, Michigan

DELTA DENTAL FOUNDATION
An Affiliate of Delta Dental of Michigan, Ohio, and Indiana

The Delta Dental Foundation is a nonprofit corporation established by Delta Dental of Michigan to fund projects to advance and promote oral health.
SEMIMAR INFORMATION AT A GLANCE

Friday, September 21, 2012
8:00 a.m. to 3:00 p.m.
Course: Prosthodontics Today—Combining New Technologies and Old Techniques (Course P156-13 Delta Gaylord)
Presenter: Michael E. Razzoog, D.D.S., M.S., M.P.H.
Location: Treetops Resort
3962 Wilkinson Road
Gaylord, Michigan
Hotel Reservations: (989) 732-6711
Course Fee: $65 nonrefundable course fee

Friday, October 19, 2012
8:00 a.m. to 3:00 p.m.
Course: Non-invasive Management of Dental Caries: Opportunities and Challenges with the Products Available Today (Course P157-13 Delta Novi)
Presenter: Carlos González-Cabezas, D.D.S., M.S.D., Ph.D.
Location: Sheraton Detroit/Novi Hotel
21111 Haggerty Road
Novi, MI 48375
Hotel Reservations: Call John Frost, (248) 349-4897
Group Rate Code: University of Michigan Dental
Course Fee: $65 nonrefundable course fee

COURSE CREDIT
Six hours of continuing dental education credit are available for each all-day seminar. Each participant must personally check in at the beginning of each course to pick up his/her course packet. The University of Michigan is an ADA Continuing Education Recognition Program (CERP) recognized provider.

HOTEL REGISTRATION
Please note: You must make your own hotel arrangements. Neither the Delta Dental Foundation nor the University of Michigan is responsible for your accommodations.

HOW TO REGISTER
Follow the links below to the University of Michigan’s online website to register for the course(s).

www.dent.umich.edu/cde

To view course details, scroll down to:
- A156-13 Delta Gaylord or
- A157-13 Delta Novi

To register:
- Click on Register Now at top right of the page
- Follow the instructions and complete the required information
- You will receive a course confirmation email immediately following your online registration

Please submit a separate online registration and payment for each person attending.

Attendance is open to dentists and their allied dental personnel. Early registration is recommended.

If you do not have access to a computer, please contact the UM School of Dentistry’s Office of Continuing Dental Education for assistance at (734) 763-5070 or (734) 763-5171.

CANCELLATION POLICY
Due to the increasing cost of sponsoring quality continuing education programs, a nonrefundable $65 registration fee is required for each attendee. This fee enables the Delta Dental Foundation to enhance its extensive support for dental education, student scholarships, and research.

PROGRAM CHECK-IN TIMES
The seminars begin at 8:00 a.m. with a lunch break at noon. (Lunch is on your own.) Check-in begins at 7:30 a.m. Confirmation and information regarding seminar location will be sent via email immediately following completion of online registration. Please note the seminars are full-day courses.

Prosthodontics Today—Combining New Technologies and Old Techniques  

Michael E. Razzoog, D.D.S., M.S., M.P.H.

COURSE OVERVIEW:
Morning Session: According to the Centers for Disease Control and Prevention (CDC) data, approximately one-third of Americans over the age of 65 are edentulous and that number is projected to increase over the next twenty years. While the implant-supported prostheses can solve many of the problems experienced by patients with complete dentures, a sound understanding of denture prosthodontics is needed to be successful. The morning will begin with principles of denture fabrication based upon a four appointment schedule and will continue with a discussion of implant options for edentulous patients, treatment planning and case selection, occlusion for complete and implant supported dentures, border molding, and overdenture versus fixed complete denture.

Afternoon Session: Pressure is mounting within the dental community for alternatives to traditional gold based porcelain-fused-to-metal restorations. The cost of metals, patient demand for esthetic restorations and the pressure on the laboratory industry are all contributing factors. The afternoon will focus on what we know about alternatives to traditional crown and bridge materials.

- Cobalt chrome
- Titanium
- Zirconia
- Alumina
- E-maxould

ABOUT THE SPEAKER:
Michael E. Razzoog, D.D.S., M.S., M.P.H.

Dr. Razzoog received his D.D.S., M.S., and M.P.H. all from the University of Michigan and is currently a professor in the Department of Prosthodontics. He has served on numerous committees for organized dentistry, government organizations and specialty groups within the profession. Within the University he has served on the Institute of Gerontology task force and acted as the interim director of continuing education and is presently the director of graduate prosthodontics. Dr. Razzoog has served as member or chair of 78 Master of Science thesis committees in prosthodontics, operative dentistry and orthodontics. He has authored over 100 journal articles and book chapters in areas of emerging technologies for prosthodontic care and has served as an editor for the International Workshop: Biocompatibility, Toxicity and hypersensitivity to Alloy Systems Used in Dentistry, Black Dentistry in the 21st Century, and Quality Assurance and Cost Containment of Dental Health Care. In recent years, his research interest is with the prosthetic aspects of dental implant usage and ceramic CAD/CAM technologies.

COURSE DETAILS:
Friday, September 21, 2012
Treetops Resort
3962 Wilkinson Road
Gaylord, MI 49735
Hotel Reservations: Call (855) 261-8764, Option 3, Group Rate Code: University of Michigan Dental
Registration: 7:30 a.m.
Course: 8:00 a.m. to 3:00 p.m.
CDE Credits: 6 hours

Seminar topics are presented in the interest of furthering dental education. Delta Dental is committed to the optimal dental health of its subscribers and, as such, endeavors to include among its covered benefits those services whose efficacy has been documented. However, a concern for cost effectiveness precludes coverage for all dental services in all of its programs. Therefore, it should not be construed that all procedures discussed and/or demonstrated in these seminars are covered under current Delta Dental program contracts.
Non-invasive Management of Dental Caries: Opportunities and Challenges with the Products Available Today  

Carlos González-Cabezas, D.D.S., M.S.D., Ph.D.

COURSE OVERVIEW:
Despite the tremendous decline in caries prevalence in the United States, dental caries is still a very common disease affecting people of all ages. In fact, it still remains the most common chronic disease in children. However, the disease is not equally distributed and about 80% of the lesions appear in only about 20% of the population. This group of people requires proper identification management at the dental office. By making relatively small changes in the diagnosis and management of active lesions, dental offices can help these patients successfully return to good health. In this course, we will cover different aspects of the diagnosis of dental caries using traditional methods and new technologies. We will also cover different management strategies for active caries lesions and patients, focusing on the use of over-the-counter, prescription, and in-office products. This course is designed for all dental health care workers: dentists, dental hygienists, dental assistants, and other dental personnel.

OBJECTIVES:
At the end of this course, the participants will be able to:
- Recognize and estimate activity of non-cavitated caries lesions
- Be familiar with the working principles and advantages/disadvantages of the new caries detection systems
- Use a simple caries risk assessment tool in their offices
- Develop a successful individualized caries management plan for caries-active patients
- Decide when and how a caries lesion should be treated
- Use a variety of commercially available products to manage dental caries based on current evidence

ABOUT THE SPEAKER:
Carlos González-Cabezas, D.D.S., M.S.D., Ph.D.

Carlos González-Cabezas, D.D.S., M.S.D., Ph.D., holds the position of associate professor (tenured) in the Department of Cariology, Restorative Sciences and Endodontics at the University of Michigan School of Dentistry. Dr. González is greatly involved in the teaching of cariology to pre-doctoral and graduate students. Dr. González’s research interests are mostly related to increasing understanding of dental caries and erosion and their clinical management. He is regularly engaged in numerous research projects, many in collaboration with other institutions from all over the world. Dr. González has particular interest in secondary caries, dental erosion-abrasion, remineralization, fluorides, and oral health products in general (e.g., dentifrices, rinses, toothbrushes, etc.).

Dr. González is on the editorial board of several scientific journals and is a regular reviewer for more than 15 scientific dental journals. He has been a consultant to most major manufacturers of oral health products, is an author of more than 45 original articles and several book chapters, and has presented more than 100 research abstracts. Dr. González regularly lectures nationally and internationally on topics related to early diagnosis and management of dental caries and erosion.
